

EasyQuest

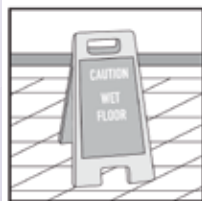

Restroom Urine Odor Eliminator.

Product made of chemical resistant enzymes that digest urine odors. It is fast and easy to apply using a trigger sprayer. Just spray EasyQuest once a day inside and around bowls and urinals to eliminate and prevent bad odors.

A natural solution to prevent and eliminate urine odors from urinals, bowls and surrounding areas. Unfortunately, the main source of bad odors in public restrooms comes from urine splashed outside bowls and urinals. The urine penetrates pores and joints of surfaces converting it into the source of bad odors. This product solves this problem, since it is applied not only inside bowls and urinals, but also on surrounding areas where splashing occurs.

SHAKE BEFORE USE. Clean bowls and urinals first. After cleaning, spray EasyQuest directly inside and outside of bowls and urinals, as well as in surrounding areas where splashing of urine may occur, such as walls and floors. Let air dry. You may mop floors after spraying to remove excess. Place "Wet Floor" signs whenever you are mopping or cleaning a floor. Leave them until floor is completely dry.

Code	Qty. per Case	Description	Bar Code
